

## Light curtain for lift doors

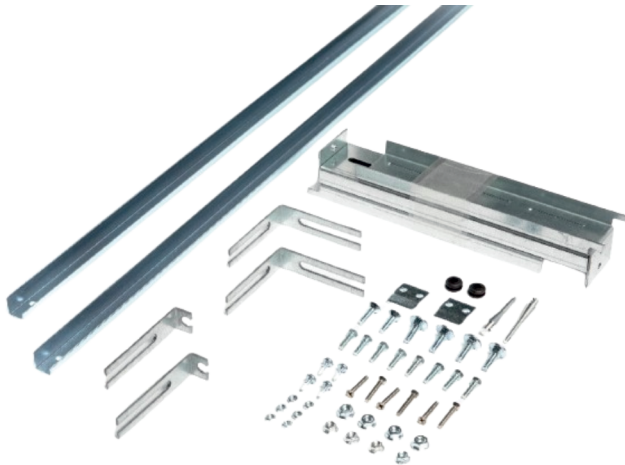

## L&L Light Curtain Lift Kit

Plug and Play adapter for connecting a light curtain to the L&L door control unit TSG V4.

## Mounting kit

Universal mounting kit for static mounting of opto edges on the door sill of the lift car and the door drive.

## Switching power supply

For using the light curtain as a stand-alone device (without TSG electronics).

## Features

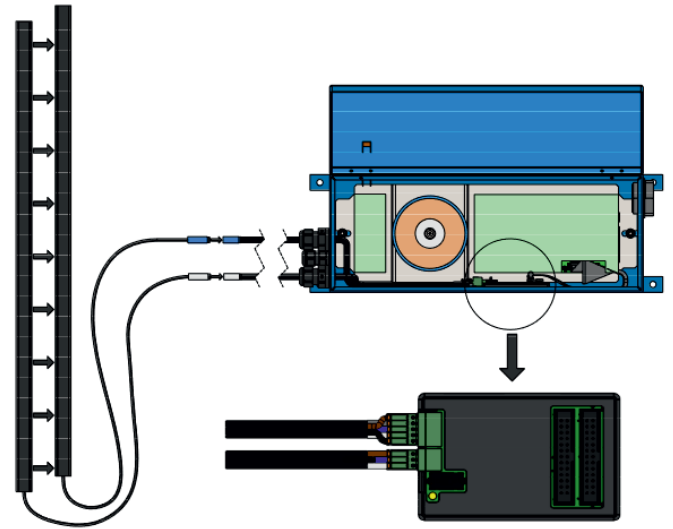

- Suitable for static and dynamic applications
- Suitable for centre and side-opening doors
- Cross beams for reliable detection
- Cross beams remain active until the door is completely closed
- Simple assembly
- Different system variants for cost optimisation
- Optional: switched-mode power supply with relay output

## Applications

Dynamic assembly

## Connection
